

Job Title: Sustainable Packaging Engineer, Allflex Livestock Intelligence

Department: Manufacturing

Position Location: Vitré, Brittany, France, world

Requisition ID: ASE#014

Allflex Livestock Intelligence is the world leader in the design, development, manufacturing and delivery of solutions for animal identification, monitoring and traceability. Our data-driven solutions are used by farmers, companies and countries to manage hundreds of millions of animals worldwide. By putting intelligent, actionable management information into farmers' hands, our solutions empower them to act in a timely manner to safeguard their animals' health and wellbeing, while achieving optimal production outcomes for a healthy food supply. Allflex Livestock Intelligence is a Livestock portfolio of digital products within MSD Animal Health.

As the largest provider of animal identification technology, we meet growing customer needs by providing over 500 million tags for identifying, tracking and monitoring animals every year and we monitor over 5.5 million cows daily, which allows access to real-time, actionable data and insights to help improve or enhance animal management and health outcomes.

With over 60 years of experience and around 1,900 team members worldwide, we have a global network of experts, each with a great depth of experience and unparalleled knowledge, who provide a valuable resource to farmers, companies and countries. Allflex Livestock Intelligence has manufacturing and technology subsidiaries in North America, Europe, Israel, South America, China, Australia and New Zealand. Our products are distributed in over 100 countries.

Through its commitment to the *Science of Healthier Animals®*, MSD Animal Health offers veterinarians, farmers, pet owners and governments one of the widest ranges of veterinary pharmaceuticals, vaccines and health management solutions and services as well as an extensive suite of digitally connected identification, traceability and monitoring products. MSD Animal Health is dedicated to preserving and improving the health, well-being and performance of animals and the people who care for them.

Job Description:

Active over the entire value chain of the project: from the diagnosis of the existing through the strategy, to the implementation to the reporting, you work in close collaboration with the procurement team, the technical team, the sales team and the group marketing team, to the Allflex packaging policy.

Your in-depth knowledge of current legislation, technologies and trends, particularly in eco-design, enables you to imagine innovative solutions, to structure and implement the global packaging strategy and to master the tools for measuring the environmental impact.

Return On Investment and result-oriented, you are also able to set up performance indicators with the management and monitor them

Your natural leadership, your communication skills and your method allow you to lead an efficient multicultural project with internal and external actors and to involve the management and the team behind you.

Evolving in a multicultural and international environment, a good command of English is of course a prerequisite, as is your availability for business trips all over the world.

Key qualifications & Competencies:

An engineer by training, specialized in packaging, you will put your expertise in materials, design, product life cycle assessment and, ideally, your knowledge of injection molding techniques at the service of the Allflex teams.

Your English is fluent.
